IR Laser

WAVESPECTRUM GROUP was founded in 1999. It is comprised by a group of experienced and innovative experts in the fields of laser physics, materials science, electronic technology and mechanical design. It has established solid cooperation with some famous universities, research institutes and laboratories.

Wavespectrum products are widely used in space science, optical communication technology, laser display, laser medical, life sciences and materials processing. With the rapid development, R&D centers and production bases have been established in China and Europe. The current plant area is 4,000 square meters, including 2,000 square meters of Class 1,000 clean workshops.

Wavespectrum products include laser diodes, fiber-coupled laser modules and fiber-coupled laser systems with wavelengths from 375nm to 1920nm. Our products are used in medical, printing, laser display, life science, laser communication and other fields. At present, the products have all passed the certifications of ROHS, REACH, CE, etc. At the same time, we have got ISO9001 quality management system certification.

Wavespectrum has world-class R&D team, and it has the world first-class production processing plants. Our products can meet the military-grade production and design standards. The products are well acclaimed world-wide, such in Germany, Austria, the United States, Japan, South Korea and other parts of the world. We have established close cooperation with a number of well-known enterprises world-wide.

Wavespectrum offers laser products with wavelength ranges from 375nm to 1920nm.

RGB (635nm+520nm+445nm) Solution
 SMF/MMF/PMF Optional
 White Color Laser Output
 Built-in TE Cooler Optional
 Long Lifetime
 High Stability

PRODUCT OVERVIEW

Triplex (RGB) Fiber Coupled White Light Laser Module is the competitive product of WAVESPECTRUM.

We couple the Red (635nm), Green (520nm) and Blue (445nm) Laser into one piece of fiber to get the white Color Laser. The Fiber Type can be Single mode Fiber (SMF) , Multimode Fiber (MMF) and Polarization Maintaining Fiber (PMF) . The fiber core can be 4um, 9um, 105um, etc. The output power can be up to 200mW. By controlling the ratio of RGB Lasers, we can get a perfect white laser. Meanwhile, by adjusting the ratio, various colors of laser also can be obtained.

WAVESPECTRUM also offer the Customized Solution for Triplex Laser Modules, such as Customized Wavelength, Customized Power and Customized Fiber Core to meet the special needs of customers.

WAVESPECTRUM use laser welding technology to guarantee the long-term reliability of the laser structure. To ensure the long-term reliability, each laser diode will undergo rigorous testing and aging in the factory. Meanwhile the high-low storage temperature circulation is also necessary for each laser diode. We set the storage temperature range from -40°C to +85°C, and it lasts 10 cycles, which will ensure the long-term reliability of the coupling structure.

Fiber Type	Part Number	Port-1	Port-2	Port-3	Package	Fiber Core	TEC	Connecto
